

Need Help Visualizing One Cubic Yard?

The easiest way to estimate how much junk you have, is to measure your pile in feet (length X width X height) and divide by 27.

$$1 \text{ cubic yard} = 3' \times 3' \times 3'$$

For example: a washing machine is approximately $3' \times 2.5' \times 3.5' = 26.5'$ divided by 27 = .97 cubic yards or approximately 1 cubic yard.
