

Mosquito Spraying Alert for September. 26 – 27, 2020

Due to positive West Nile mosquito tests, the City of Mansfield will conduct targeted ground spraying. Spraying is expected to begin Saturday, Sept. 26 through Sunday, Sept. 27. Spraying will be conducted between 9 p.m. and 5 a.m. Please reference the map below showing the specific spray areas.

Please watch social media or check the City's website for updates should there be a change in the spraying schedule due to weather. All residents are encouraged to continue to follow the **4D's** of personal protection throughout the mosquito season regardless of surveillance results.

Dusk to Dawn - stay indoors when mosquitos are active

Drain - standing water in your yard where water might collect in places like flower pots, toys, clogged rain gutters and wading pools

Dress - in light-colored long sleeves and pants

DEET - apply repellent when outdoors

Personal protection and elimination of breeding habitat are the best, most cost effective means of mosquito control. Individual residents are the only ones who can ensure these steps are taken. If you have any questions or would like more information regarding the city's mosquito control program, visit <https://www.mansfieldtexas.gov/248/Mosquito-Control>
