

Spraying Alert Tuesday, July 13- Wednesday, July 14, 2021

Notice of Upcoming Spray Areas

Due to positive West Nile mosquito tests, the City of Mansfield will conduct targeted ground spraying. Spraying is expected to begin Tuesday, July 13 through Wednesday, July 14, 2021. Spraying will be conducted between 9 p.m. and 5 a.m. Please reference the map below showing the specific spray areas. To be aware of future spraying events, register for notification of spraying through [Notify Me](#).

All residents are encouraged to continue to **follow the 4D's** of personal protection throughout the mosquito season regardless of surveillance results.

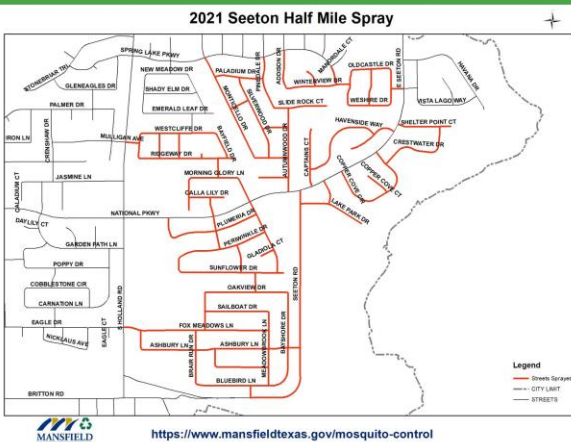

- **Dusk to Dawn** - stay indoors when mosquitoes are active
- **Drain** - standing water in your yard where water might collect in places like flower pots, toys, clogged rain gutters and wading pools
- **Dress** - in light-colored long sleeves and pants
- **DEET** - apply repellent when outdoors

Personal protection and elimination of breeding habitat are the best, most cost effective means of mosquito control. Individual residents are the only ones who can ensure these steps are taken.

Adult mosquito control procedures, particularly spraying of adulticides, should and will be considered a supplemental control measure of last resort.
