

Targeted Mosquito Spraying Beginning Tuesday, July 20, 2021

Due to positive West Nile mosquito tests, the City of Mansfield will conduct targeted ground spraying. Spraying is expected to begin Tuesday, July 20 through Thursday, July 22. Spraying will be conducted between 9 p.m. and 5 a.m. Please reference the maps below showing the specific spray areas. **Map #1 will be sprayed three consecutive nights** beginning Tuesday, July 20 through Thursday, July 22. **Maps #2, #3 and #4 will be sprayed two consecutive nights** beginning Tuesday, July 20 through Wednesday, July 21. Please watch social media or check the City's website for updates should there be a change in the spraying schedule due to weather.

All residents are encouraged to continue to **follow the 4D's** of personal protection throughout the mosquito season regardless of surveillance results.

- **Dusk to Dawn** - stay indoors when mosquitos are active
- **Drain** - standing water in your yard where water might collect in places like flower pots, toys, clogged rain gutters and wading pools
- **Dress** - in light-colored long sleeves and pants
- **DEET** - apply repellent when outdoors

Personal protection and elimination of breeding habitat are the best, most cost effective means of mosquito control. Individual residents are the only ones who can ensure these steps are taken.

If you have any questions or would like more information regarding the city's mosquito control program, visit <https://www.mansfieldtexas.gov/248/Mosquito-Control>.
