Revised: September 25, 2009

Federal Emergency Management Agency

FLOOD INSURANCE STUDY NUMBER

48439CV009A
NOTICE TO
FLOOD INSURANCE STUDY USERS

Communities participating in the National Flood Insurance Program have established repositories of flood hazard data for floodplain management and flood insurance purposes. This Flood Insurance Study may not contain all data available within the repository. It is advisable to contact the community repository for any additional data.

Part or all of this Flood Insurance Study may be revised and republished at any time. In addition, part of this Flood Insurance Study may be revised by the Letter of Map Revision process, which does not involve republication or redistribution of the Flood Insurance Study. It is, therefore, the responsibility of the user to consult with community officials and to check the community repository to obtain the most current Flood Insurance Study components.

First Countywide FIS Effective Date: January 6, 1993
First Revised Countywide FIS Revision Date: August 2, 1995
Second Revised Countywide FIS Revision Date: August 23, 2000
Third Revised Countywide FIS Revision Date: September 25, 2009
# TABLE OF CONTENTS

## VOLUME 1

1.0 **INTRODUCTION**

1.1 Purpose of Study ................................................................. 1
1.2 Authority and Acknowledgments ....................................... 1
1.3 Coordination ......................................................................... 7

2.0 **AREA STUDIED**

2.1 Scope of Study ........................................................................ 7
2.2 Community Description ....................................................... 26
2.3 Principal Flood Problems ......................................................... 28
2.4 Flood Protection Measures ..................................................... 30

3.0 **ENGINEERING METHODS**

3.1 Hydrol ogic Analyses ............................................................ 32
3.1.1 New Detailed Study Streams .............................................. 33
3.1.2 Redelineated Detailed Study Streams .................................. 34
3.2 Hydraulic Analyses ............................................................... 92
3.2.1 New Detailed Study Streams .............................................. 93
3.2.2 Redelineated Detailed Study Streams .................................. 95
3.3 Vertical Datum ........................................................................ 103

**FIGURES**

Figure 1 – Frequency Discharge, Drainage Area Curves .................. 36

**TABLES**

Table 1 – Scope of Study .......................................................... 8
Table 2 – Stream Name Changes .................................................. 26
Table 3 – Summary of Discharges ................................................ 47
Table 4 – Summary of Reservoir Elevations ................................... 91
Table 5 – Summary of Roughness Coefficients ......................... 96

## VOLUME 2

4.0 **FLOODPLAIN MANAGEMENT APPLICATIONS** .................. 104
4.1 Floodplain Boundaries ......................................................... 104
4.2 Floodways ............................................................................ 104

5.0 **INSURANCE APPLICATIONS** ............................................. 210

6.0 **FLOOD INSURANCE RATE MAP** ........................................ 211
